

ETR's Health Equity Framework.

Health and education outcomes are influenced by complex interactions between people and their environment.

etr.org

Relationships and Networks

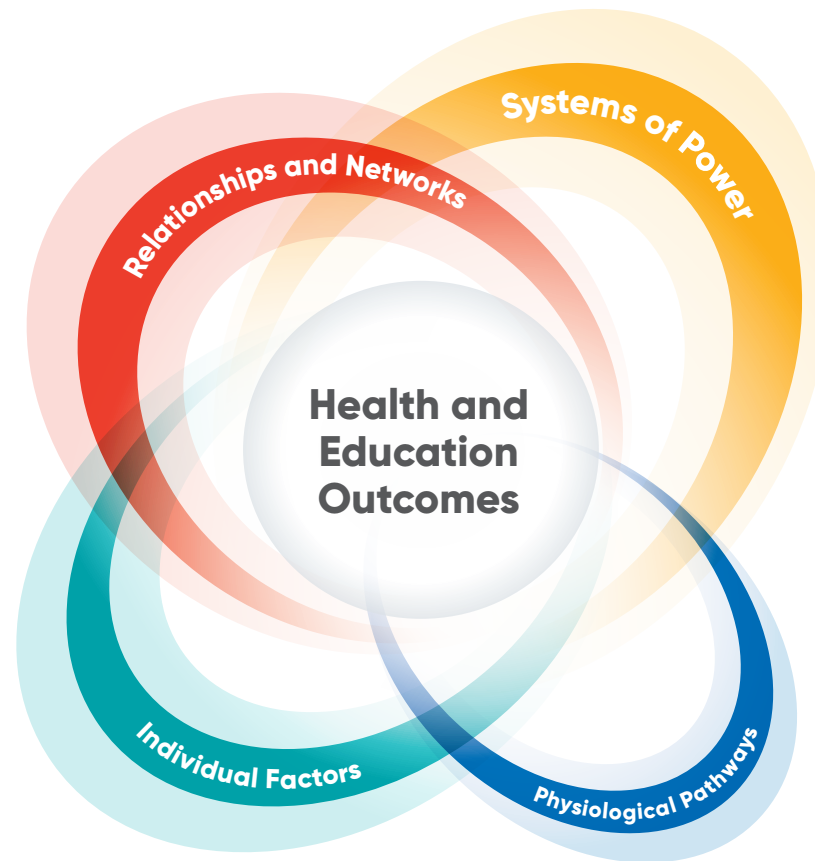

Connections with family, friends, partners, community, school and workplaces that:

- + Promote health equity through support systems that encourage health-promoting choices
- Intensify health inequities through social networks that enable health-harming behaviors

Individual Factors

A person's response to social, economic and environmental conditions that:

- + Promotes health equity through attitudes, skills and behaviors that enable their personal and community's health
- Intensify health inequities through attitudes, skills or behaviors that cause harm to their personal or community's health

Systems of Power

Policies, processes, practices that:

- + Promote health equity through fair access to resources and opportunities that enable healthy lives
- Intensify health inequities by allowing unfair social, economic or environmental advantages for some groups over others

Physiological Pathways

Factors that:

- + Promote health equity when a person's physical, cognitive and psychological abilities are maximized
- Intensify health inequities when a person's environment or experiences has impaired their physical, cognitive or psychological functions

Health Equity

Having the personal agency and fair access to resources and opportunities needed to achieve the best possible physical, emotional and social well-being.

Health Inequities

The preventable differences in health outcomes closely linked to social, economic and environmental conditions.
