

# PRE-QUESTIONNAIRE

Date: \_\_\_\_\_ (7-14)

The questions in this booklet are about things related to your health, as well as general questions about your background. Some questions ask about what you know; others ask your opinion on things; and others ask about things you may or may not have done. There is always an answer that lets you tell us when you have not done things, as well as when you have done them. Knowing what you have not done is just as important as knowing what you have done.

Some of the questions are very personal and ask about different sexual activities that some people do. These particular questions are very blunt and to the point—questions you probably have never seen on a questionnaire before. Most of the questions are not like this, however. If a question bothers you so much that you do not want to answer it, you can skip that question and continue with the questionnaire. We warn you about the questions that are personal and blunt so that you will not be surprised when you see them. Please answer all of the questions honestly. Your answers will be kept completely confidential; no one from your school or home will ever see your answers. Please work by yourself, and do not talk with others while you are answering the questions.

(7-14)

The questions in this booklet are about things related to your health, as well as general questions about your background. Some questions ask about what you know; others ask your opinion on things; and others ask about things you may or may not have done. There is always an answer that lets you tell us when you have not done things, as well as when you have done them. Knowing what you have not done is just as important as knowing what you have done.

Some of the questions are very personal and ask about different sexual activities that some people do. These particular questions are very blunt and to the point—questions you probably have never seen on a questionnaire before. Most of the questions are not like this, however. If a question bothers you so much that you do not want to answer it, you can skip that question and continue with the questionnaire. We warn you about the questions that are personal and blunt so that you will not be surprised when you see them. Please answer all of the questions honestly. Your answers will be kept completely confidential; no one from your school or home will ever see your answers. Please work by yourself, and do not talk with others while you are answering the questions.

## A. SEXUAL ATTITUDES

The following questions ask how you feel about different behaviors. Please indicate how good or bad an idea it is to do the following, whether others would approve or disapprove of the behavior, and whether you plan to do these behaviors in the next 3 months (90 days). Circle the NUMBER that best describes your feelings. Sexual intercourse refers to a male putting his penis in a female's vagina. (Try to answer the questions even if you have not had sexual intercourse or have never used condoms.)

How would the following people feel about you having sex in the next 3 months?
